Performance and Forecast of the World Connector Industry

The ***2020 World Cable Assembly Market*** report offers an in-depth analysis of this growing and thriving industry. The worldwide cable assembly market is forecast to grow at a compound annual rate of 14.6% from 2020 to 2025. However, the economic damage that will occur from the 2020 COVID-19 pandemic, which is severely rocking the world economy, is unknown. Past and forecasted regional GDP growth and market sector performance were primary drivers for the projections of the industry's contraction and anticipated growth." Worldwide market share in the cable assembly market is beginning to stabilize, and the shift overseas has slowed. The fastest growing market segment is Telecom/Datacom with a five-year CAGR of 16.4%. This market growth is primarily the result of the need for expanded network infrastructure and conversion to 5G. The automotive market, the largest cable assembly market sector, will also continue to grow after the 2020 downturn, and will spur growth in the industrial sector in 2021. After two decades of strong growth, China's cable assembly industry is now the largest in the world, holding a market share of 28.9% in 2019. Will China's market share continue to grow?

This 17-chapter, 203-page, report provides a detailed analysis, in US dollars, for the years 2019 through 2025, by region, end-use equipment sector, and cable assembly type. Our analysis is provided numerically and graphically, allowing the reader to easily view and understand upcoming trends.
